

-Sprint 1 Retrospective-

GOOD	TO BE IMPROVED	BAD
<ul style="list-style-type: none"> ○ GitHub Pull Requests ○ INVEST properties for our user stories ○ Sorting by priority ○ Addition of tasks ○ Wording using stories ○ Overall Sprint review meeting ○ Descriptive Git commits 	<ul style="list-style-type: none"> ○ Add a dictionary key at the bottom of backlogs ○ Commit backlogs to GitHub everyday for History of file ○ Individualised how many story points each person can do then team velocity ○ Keep track of tasks using GitHub project feature ○ One branch per feature ○ More in-depth scrum meeting summary ○ For scrum meetings – talk about the specific user stories being worked on instead of just general tasks ○ Take notes/update sprint backlog during the scrum meeting ○ Talk more about problems during scrum ○ Scrum master should recap what everyone should be working on for the day at the end of scrum ○ Communicating more in pair programming, “thinking aloud” mentality ○ More line-by-line coding instead of debugging ○ Look at Git Flow 	<ul style="list-style-type: none"> ○ Assigning multiple people to tasks ○ Not uploading the backlogs on GitHub everyday ○ No burndown chart ○ Not assigning story points on SB for user stories ○ Not showing burn-down rate per person ○ Committing straight to master ○ No videos on GitHub ○ Not doing scrum meeting at the start of the day
